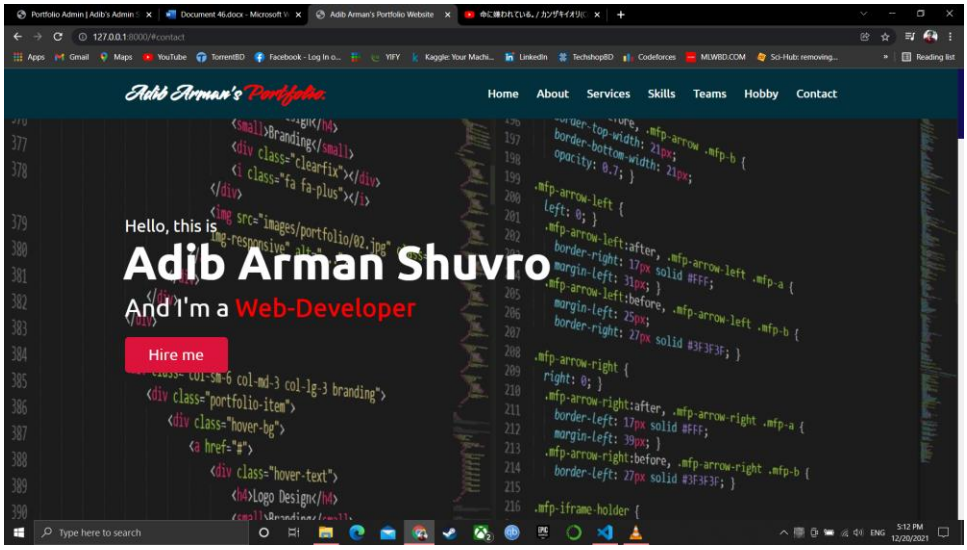
Summary:

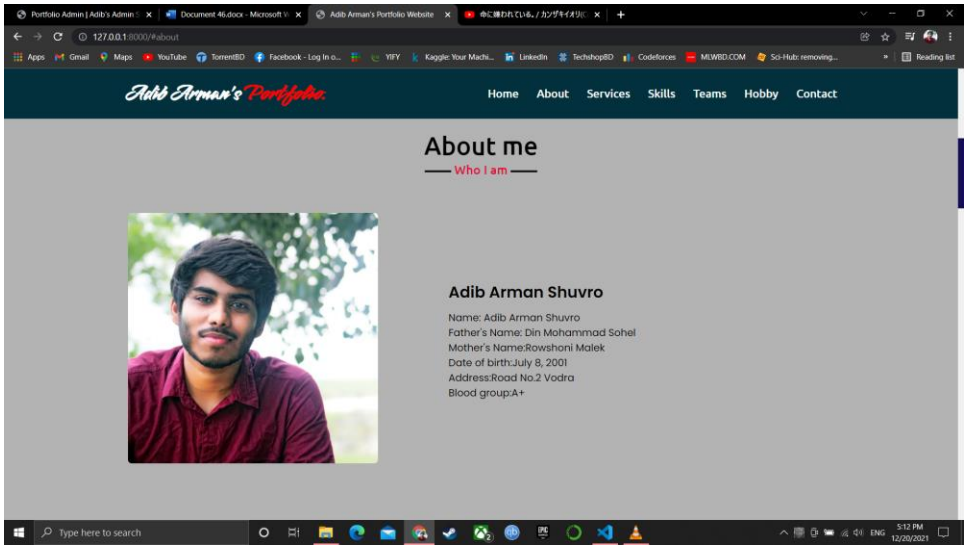
This is about web development, to develop a portfolio website. Having a portfolio website is a must because to introduce it is essential to show a person's information and skills. It helps to display the qualities of that person. Its main purpose is to help someone to introduce themselves and to get a workplace for this website. It has a lot of benefits including, Introducing, showcasing skills and experiences, etc.

Portal:

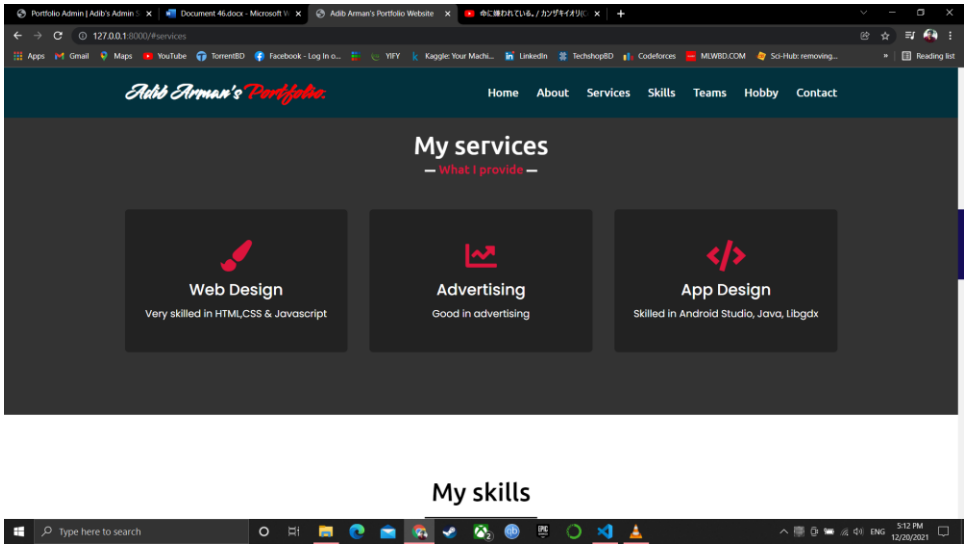
1. **Home:** In this section we have the introduction of certain person and who's portfolio is this.



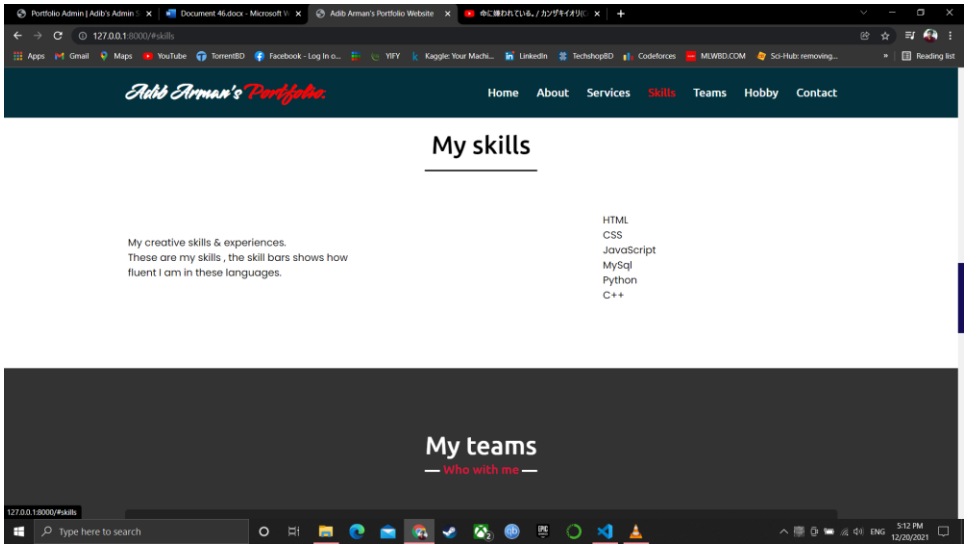
2. **About:** In About Section, there is the information of the person's portfolio.



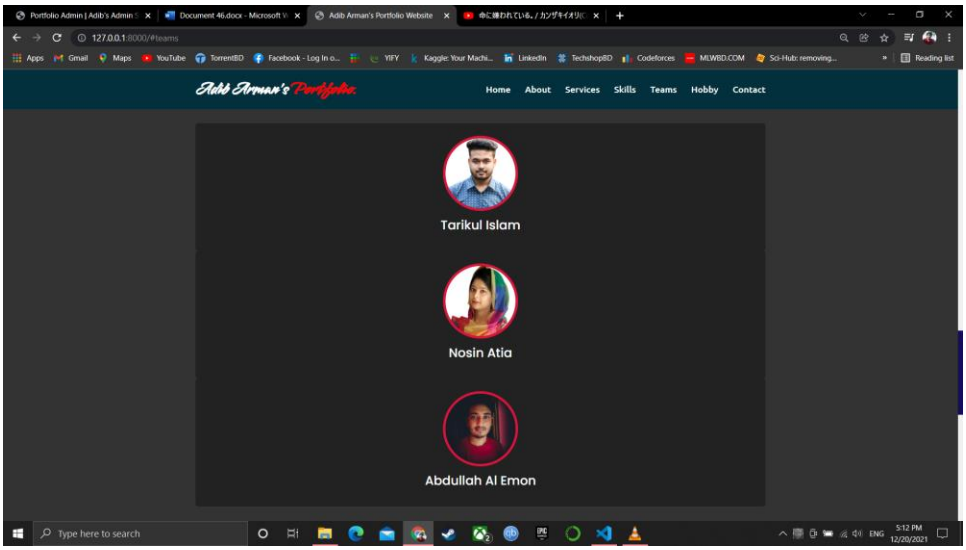
3. **Service:** In this section, this certain person's services are shown.



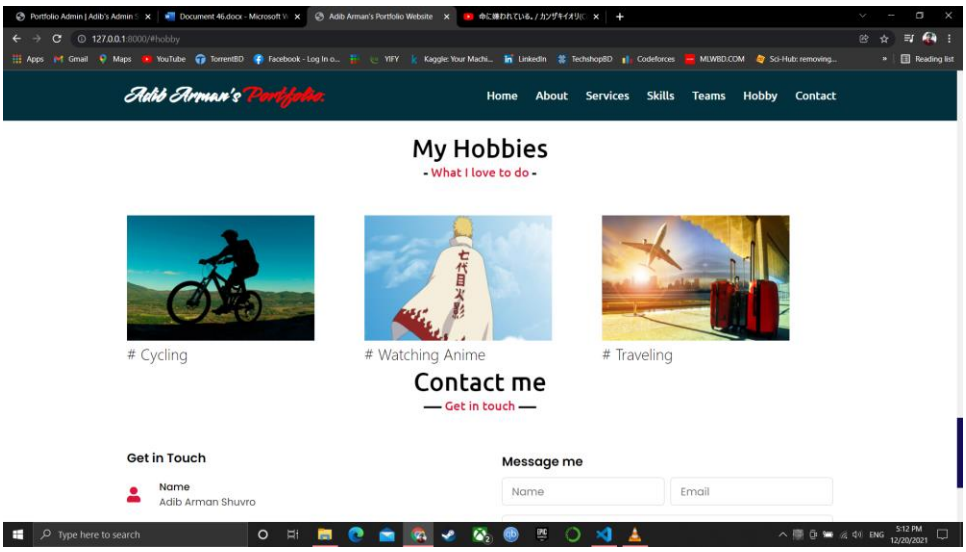
4. **Skills:** In this section, the skills of that person in which language is he good at is shown.



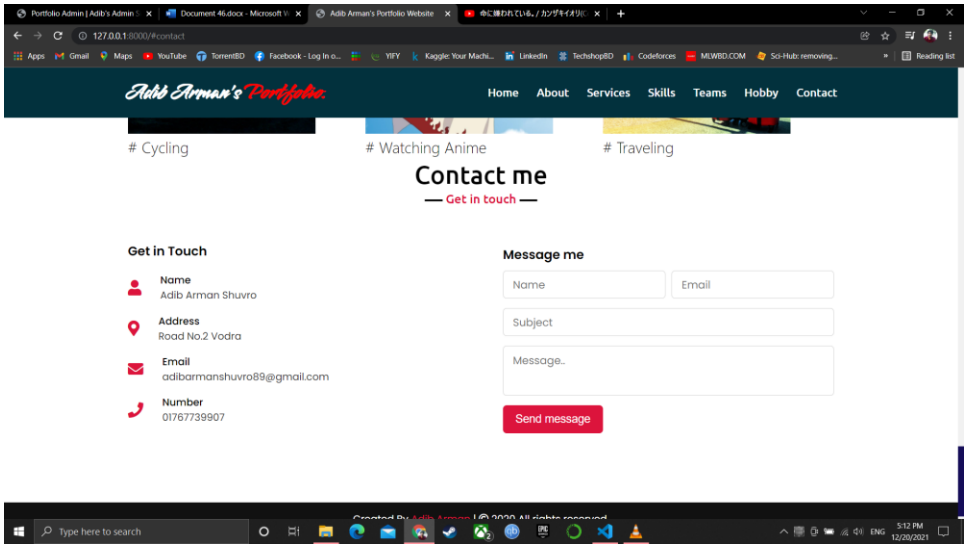
5. Teams: This section shows who worked with that person.



6. **Hobby:** This section includes the hobbies of that person.

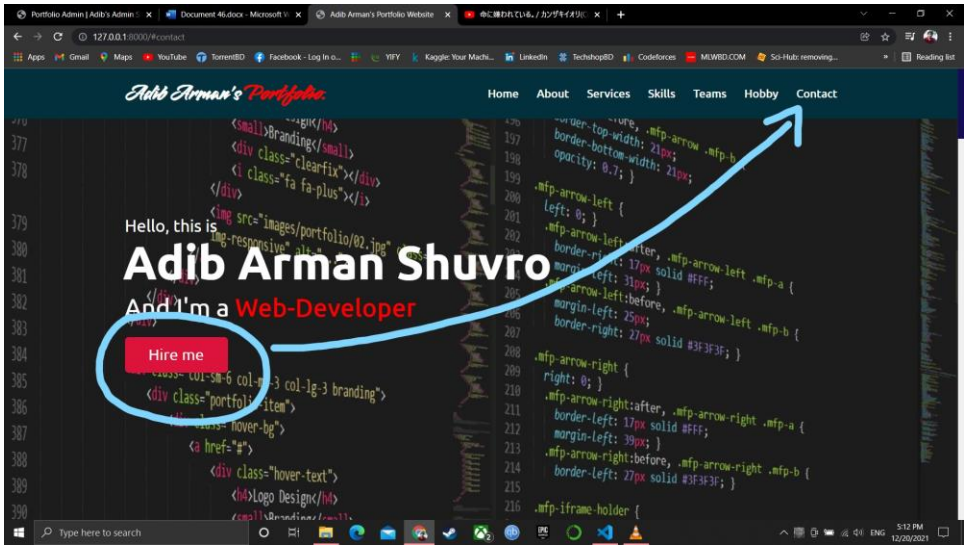


7. **Contact:** This section includes contacts and information about the person.

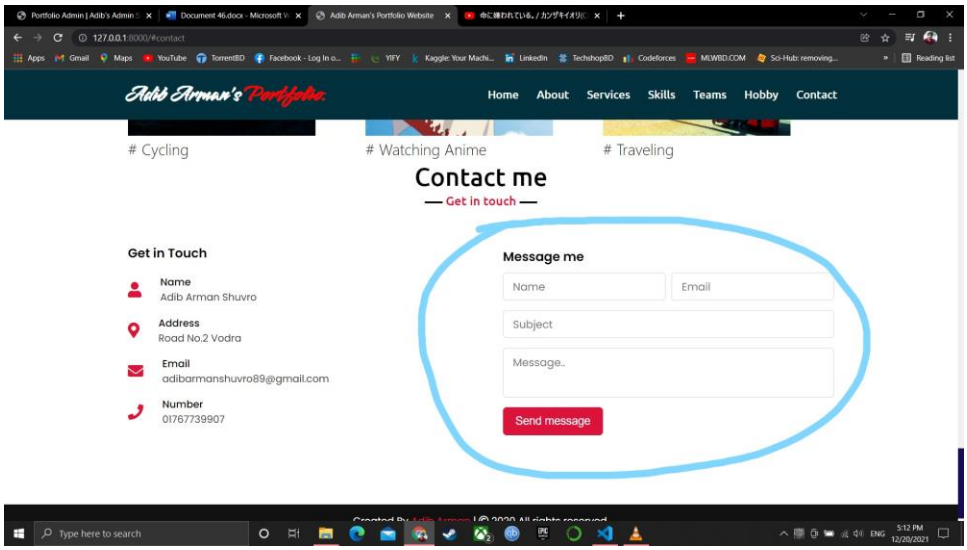


Some other features:

1. By clicking ‘Hire me’ in the website, the website redirects to contact page.



2. There is a message box in the contact page. If someone has any question or request, he/she can leave a message. And the message will be sent in the admin's email.



<u>Admin:</u> To change the information in the webpage, the user needs to access the admin panel for this the admin username and password is, "Username: saitama Pass: 1234" from this, the user can add, delete, update new data into the webpage information. For example, in the 'About' section if the admin wishes to change the address of that person, then he/she can change it.
